WASTE MINIMIZATION STATEMENT FOR CALENDAR YEAR 2011

We are currently exporting a by-product generated from precious metal refining operations. This material was originally processed in-house or by U.S. treatment facilities. A 2003 cost effectiveness analysis determined a financial benefit existed if foreign companies handled the material. In the 1st quarter of 2004, we initiated the process to have the by-product exported to treatment facilities in Canada.

We generated and exported approximately 966,143 pounds of material in calendar year 2011.

Our 2010 / 2011 EPA Acknowledgement of Consent to Export covered the period from February 22, 2010 to February 19, 2011. While our 2011 / 2012 EPA Acknowledgement of Consent covers the period from February 23, 2011 to February 22, 2012.

In 2010, we projected a five- (5) percent increase in processed materials for calendar year 2011. An actual nine- (9) percent decrease occurred. Based on 2011 data, we project a five- (5) percent increase for 2012.

In 1995, our Company instituted a revised waste reduction program and we are very confident that the program uses the "Best Affordable Technology" available. We will continue to use the good housekeeping practices and inventory control procedures incorporated with our first waste minimization program (1991). In addition, we'll continue to investigate the possibilities of using U.S. treatment facilities to process this by-product.

Our precious metal refining streams remained on par with previous year's materials. The toxicity of this material has remained roughly the same since 1991 and we do not anticipate any major variance in the future.

We, at Advanced Chemical Company, are committed to reducing our wastes. This is done not only for economic reasons, but also for the greater environmental impact it holds for the future. Advanced will continue to seek State of the Art Technology to improve this crucial area when economically feasible.

WASTE MINIMIZATION STATEMENT FOR CALENDAR YEAR 2011

In 2010, Advanced developed a new technology that allowed our Company to process the material in-house. This process eliminated the need to export any material in 2011.

Our 2010 / 2011 EPA Acknowledgement covered the period from August 17, 2010 to August 16, 2011.
